

Sankofa Twi — Instagram Ad Campaign

Creative brief · Sign-up driver · Two cultural moments (World Cup + Detty December)

The big idea — “SPEAK LIKE YOU BELONG.”

Twi is the switch that flips you from spectator to participant. On match day it turns you from someone watching Ghana into someone talking noise in the group chat. In December it turns you from a tourist paying tourist prices into family being welcomed home. One line ties both: **Twi is your way in.** Every ad ends on a real Twi phrase said out loud (app audio) — a free, shareable micro-lesson.

FLIGHT 1 — World Cup: “Trash talk in Twi”

Hook: *Ghana vs Colombia — do you want to talk to your opponents on match day?* - **1A The Comeback (Reel):** “POV: the Colombia fan next to you starts talking...” → you reply in Twi. Phrase: **Yɛbedi nkonim** (we will win). - **1B Match-Day Starter Pack (Carousel):** Ghana bedi nkonim! · Hwɛ ɛha! · Yɛn ara asaase ni. - **1C Two Fans, One Bench (Static meme):** “Talk your talk. In Twi.” Tone: loud, competitive, funny. Stadium/afro-drums. Red-gold-green.

FLIGHT 2 — Detty December: “Learn Twi before you land”

Hook: *Traveling to Ghana this December? Learn Twi.* - **2A Obroni Price (Reel):** ask price in English (high) → in Twi (lower + banter). Phrases: **Ɛyɛ sɛn? / Te so kakra.** - **2B Arrivals (Reel):** homecoming montage — Akwaaba · Ɛte sɛn? · Medaase · Me pɛ this one. - **2C December Countdown (Story/Carousel):** phrase-a-day to the travel date. Tone: warm, cinematic, belonging. Amapiano. Golden hour, kente, family.

Targeting (Meta)

Ghanaian + African diaspora in US/UK/Canada + Ghana. Interests: Black Stars, Afrobeats/Amapiano, Burna Boy, Davido, Sarkodie, Accra, Ghana travel, Detty December. Football-event engagers (F1) + travel-intent (F2). Lookalikes off sign-ups; retarget 50%+ video viewers and site visitors.

Funnel & CTA

Every CTA → sankofaapp.io → “Join the beta.” Add UTMs (utm_campaign=worldcup / dettydec). Match the landing page’s first screen to the ad’s phrase.

Test plan (2 weeks)

2 hooks × 3 creatives = 6 ads, small budget, optimize for landing-page sign-up. Kill bottom third by day 4; spin 2 new variants off the winning hook. Track cost-per-sign-up, not just CTR.

Production

UGC-first (one football-loud creator, one travel-warm). Reusable gold-Sankofa end card. Sound on by default with burned-in captions.

Branded reel frames for both flights are in `instagram/campaign/` (worldcup_cover, worldcup_endcard, detty_cover, detty_endcard).
