

Sankofa Twi — First 9 Posts: Captions + How-To

Nine ready-to-upload 1080×1080 images live in `posts/`. Built as a cohesive charcoal/cream checkerboard so a new visitor lands on a complete-looking grid.

Regenerate anytime: edit the content block at the bottom of `generate_posts.py` and run `python3 generate_posts.py`.

The 3×3 grid map

Instagram fills the grid top-left → right, newest first, so post them in **reverse order** (08 first, 00 last) and then **pin the intro** so it holds top-left.
